

MILLENNIUM
GARAGE DOORS

Series 2240

For strength and longevity, Series 2240 utilizes heavy 24-gauge steel without sacrificing beauty. The exterior of the door is embossed with a woodgrain texture finish accented by the elegant raised panel design. The series 2240 is composed of 24 gauge hot dipped galvanized steel painted with a 2 coat baked-on polyester coating. All doors are reinforced for strength and safety. Each Millennium Garage Door includes a PVC bulb-type weatherstrip to protect against wind and rain penetration. Series 2240 is backed by a limited lifetime warranty.

- ▲ 24 gauge elegant wood grain textured steel
- ▲ Embossed raised panel design
- ▲ 2" thick sections
- ▲ Tongue and groove joint system
- ▲ Heavy gauge galvanized stiles
- ▲ 18" and 21" section heights
- ▲ Pre-painted white or almond
- ▲ Custom sizes available

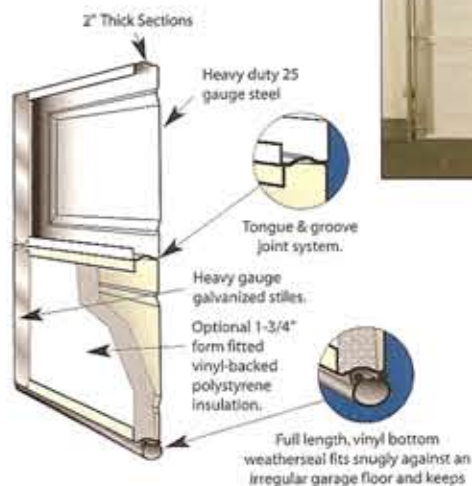

Shown with optional vinyl-backed insulation feature.

Series 2250

Cost effective Series 2250 offers exceptional value without sacrificing beauty or durability. The exterior of the door is embossed with a woodgrain texture finish accented by an elegant raised panel design. The series 2250 is composed of 25 gauge hot dipped galvanized steel painted with a 2 coat baked-on polyester coating. All doors are reinforced for strength and safety. Each Millennium Garage Door includes a PVC bulb type weatherstrip to protect against wind and rain penetration. Series 2250 is backed by a limited ten-year warranty.

- ▲ 25 gauge elegant wood grain textured steel
- ▲ Embossed raised panel design
- ▲ 2" thick sections
- ▲ Tongue and groove joint system
- ▲ Heavy gauge galvanized stiles
- ▲ 18" and 21" section heights
- ▲ Pre-painted white or almond
- ▲ Custom sizes available

Series 6250

Our top of the line Series 6200 insulated, thermally efficient garage door offers exceptional beauty and durability. Millennium's unique sandwich construction ensures the door is equally attractive inside and out. The core is precision molded polystyrene insulation bound with hot melt urethane glue. This insulation is sandwiched between two reinforced, prepainted galvanized door skins for highest thermal efficiency. The exterior is embossed with a woodgrain texture finish accented by an elegant sculpted raised panel design. Each Millennium Garage Door includes a PVC bulb type weatherstrip to protect against wind and rain penetration. Series 6250 is backed by a limited lifetime warranty.

- ▲ 25 gauge elegant wood grain textured steel
- ▲ Embossed raised panel steel
- ▲ 2" thick sections
- ▲ Tongue and groove joint system
- ▲ 18" and 21" section heights
- ▲ Pre-painted white or almond
- ▲ Custom sizes available
- ▲ R-Value 7.8
- ▲ Heavy duty reinforced hinge plate

Unsurpassed Rustproofing System

Steel surface is rust-proofed with hot-dipped galvanizing then pre-painted with a baked-on primer and finished with a baked-on polyester top coat in white or almond. Doors may also be painted to match the exterior of the home.
